LASER TATTOO REMOVAL

AN IN-DEPTH TREATMENT GUIDE
WHAT IS enlighten™ LASER TATTOO REMOVAL?

enlighten™ Laser Tattoo Removal is the world’s first dual wavelength and dual pulse duration laser system which offers industry-leading power, treatment depth and speed for the most efficient and complete tattoo removal systems.

At Victoria’s Cosmetic Medical Clinic, we provide enlighten™ laser tattoo removal to those seeking to remove the appearance of unwanted tattoos on the body. Using both picosecond and nanosecond technology, enlighten™ is able to efficiently break down the particles of ink in the tattoo.
HOW MANY TREATMENTS WILL I NEED?

The number of treatments you receive will vary depending on a number of different characteristics of the tattoo:

- Composition
- Depth
- Colour
- Size
- Age

Multiple treatments will most likely be required. Most often, 3-6 treatments are needed to permanently remove the tattoo.

WHY DO I NEED TO HAVE MORE THAN ONE TREATMENT?

Tattoo ink is set deep in the skin. In order to properly reach all of the ink underneath the skin’s surface, more than one laser treatment is required.
IS ENLIGHTEN™ TATTOO REMOVAL SUITABLE FOR EVERYONE?

During your enlighten™ laser tattoo removal consultation at Victoria’s Cosmetic Medical Clinic, your technician will assess the tattoo and discuss the most appropriate course of action for your unique case.

WILL THE TATTOO BE COMPLETELY REMOVED?

In many cases the tattoo will completely disappear. However, some ink colours are more challenging to remove compared to others. During your consultation, we will carefully assess your case to ensure enlighten™ tattoo removal is appropriate for you.
DOES ENLIGHTEN™ LASER TATTOO REMOVAL HURT?

Patient’s have likened the pain of enlighten™ to that of having a rubber band snapped against the skin.

ARE THERE SIDE EFFECTS OF LASER TATTOO REMOVAL?

Redness and swelling is common immediately after treatment. There are temporary side effects, but these will subside over time.
