## COOLSCULPTING IS THE LIPOSUCTION ALTERNATIVE WITH NO DOWNTIME, NO NEEDLES AND NO SURGERY!

The innovative treatment has been turning heads, gaining rave reviews and winning awards everywhere. CoolSculpting has been covered by numerous magazines, appeared on the most popular medical programmes and gained multiple celebrity endorsements.

At Victoria's Cosmetic Medical Clinic, we are proud CoolSculpting providers. Our highly trained clinicians have attended exclusive education courses in Tasmania (CoolSculpting University).

We're thrilled to have been part of some amazing transformative journeys our clients have experienced through CoolSculpting.

# COOLSCULPTING FACT SHEET

The device is placed on the target area to activate the cooling process.

The treatment generally requires one hour per area.

85% of CoolSculpting patients would refer a friend or family member

Most patients experience 25% fat reduction in treatment area.

Multiple treatments will achieve the best outcome.

CoolSculpting boasts a 90% patient satisfaction rating

CoolSculpting does not harm the skin or have long-term complications.

## 3 MONTHS

It can take 3-4 months to visibly see the full effect.

87%

CoolSculpting demographics

## 30 DAYS

Fat begins to die in 3 days, peaking at 30 days.

## WORLD #1

CoolSculpting is the #1 non-invasive fat-reduction procedure.

Once the CoolSculpting treatment eliminates the fat cells, they are gone for good!

## WHAT IS COOLSCULPTING?

Most people have at least one area of their body which they feel they cannot shift stubborn fat from – whether it is their stomach, buttocks, thighs or upper arms.

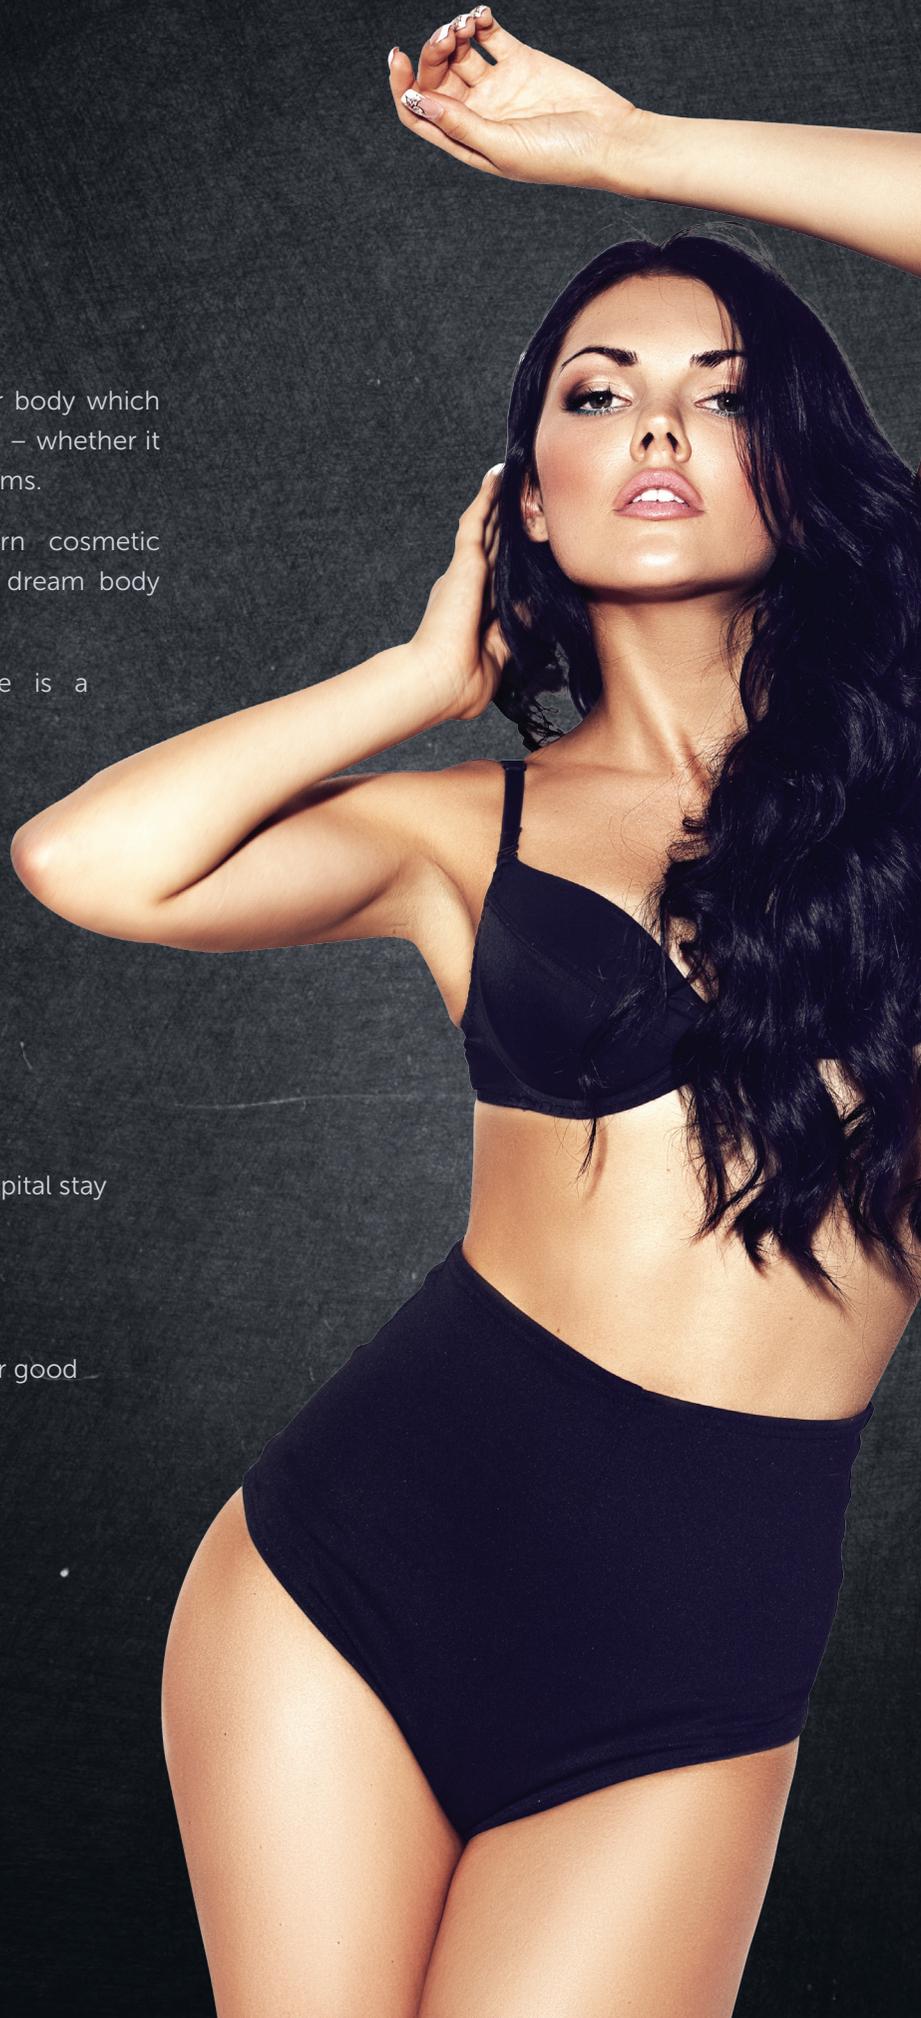

Fortunately, with the benefits of modern cosmetic technology, you don't have to leave your dream body shape at the wayside.

The CoolSculpting fat-freezing procedure is a clinically approved, non-surgical fat-reduction treatment which uses controlled cooling to eliminate stubborn fat that resists all efforts of diet and exercise.

### **The results are proven, noticeable, and lasting.**

CoolSculpting has some incredible benefits.

- It's a non-invasive procedure
- There is no required anaesthetic or hospital stay
- It involves minimal to no recovery time
- It provides natural results
- Once the fat cells die, they are gone for good

## WHAT IS THE COOLSCULPTING PROCEDURE?

The CoolSculpting procedure uses round, rectangular paddles that suction onto your skin and fat cells like a vacuum.

This technology targets and crystallises (kills) fat cells and remarkably induces a 25% fat reduction in a single CoolSculpting® cycle. The procedure generally requires 1 hour per area and patients report little to no discomfort.

Prepare to sit still and relax for some time while you enjoy a magazine, book or movie. CoolSculpting is completely non-surgical, so typically you can return to normal activities immediately. Some patients experience redness, minor bruising, tingling, numbness or discomfort in the treated area, but this is temporary and will resolve completely. Overall patients have not described this procedure as unsettling.

Results are noticeable within a few weeks and continue to improve over 3 – 4 months.

# COMMON QUESTIONS

## **Am I a good candidate for CoolSculpting?**

The CoolSculpting fat-reduction treatment is specifically designed to target stubborn fat in localised areas. Good candidates for CoolSculpting have noticeable bulges in areas which they have been unable to reduce through diet or exercise.

## **How long does the treatment take?**

The procedure generally requires 1 hour per treatment area. While you're undergoing the treatment you're able to relax and read a book or even watch a movie if you wish.

## **Is there any pain/discomfort involved in the procedure?**

Most patients find the treatment quite comfortable. As the CoolSculpting applicator is placed on the area, patients typically feel intense cold and suction, but this dissipates after a few minutes and the localised area will become numb after 5 to 10 minutes.

## **How many CoolSculpting treatments do I need?**

The majority of patients will only require one or two CoolSculpting treatments to achieve good results.

In fact, many are very happy with the results achieved in just one treatment.

## **When will I see results?**

It can take 3 – 4 weeks before you will start to see the results of your CoolSculpting treatment. You should see the most dramatic results after 3 – 4 months post treatment.

## **How do I get started?**

Call us today to set up a consultation. We'll assess your suitability for CoolSculpting and work with you to develop a personalised treatment plan.

9 OUT OF 10 PATIENTS HAVE A  
REDUCTION OF FAT AFTER  
JUST ONE COOLSCULPTING  
TREATMENT.

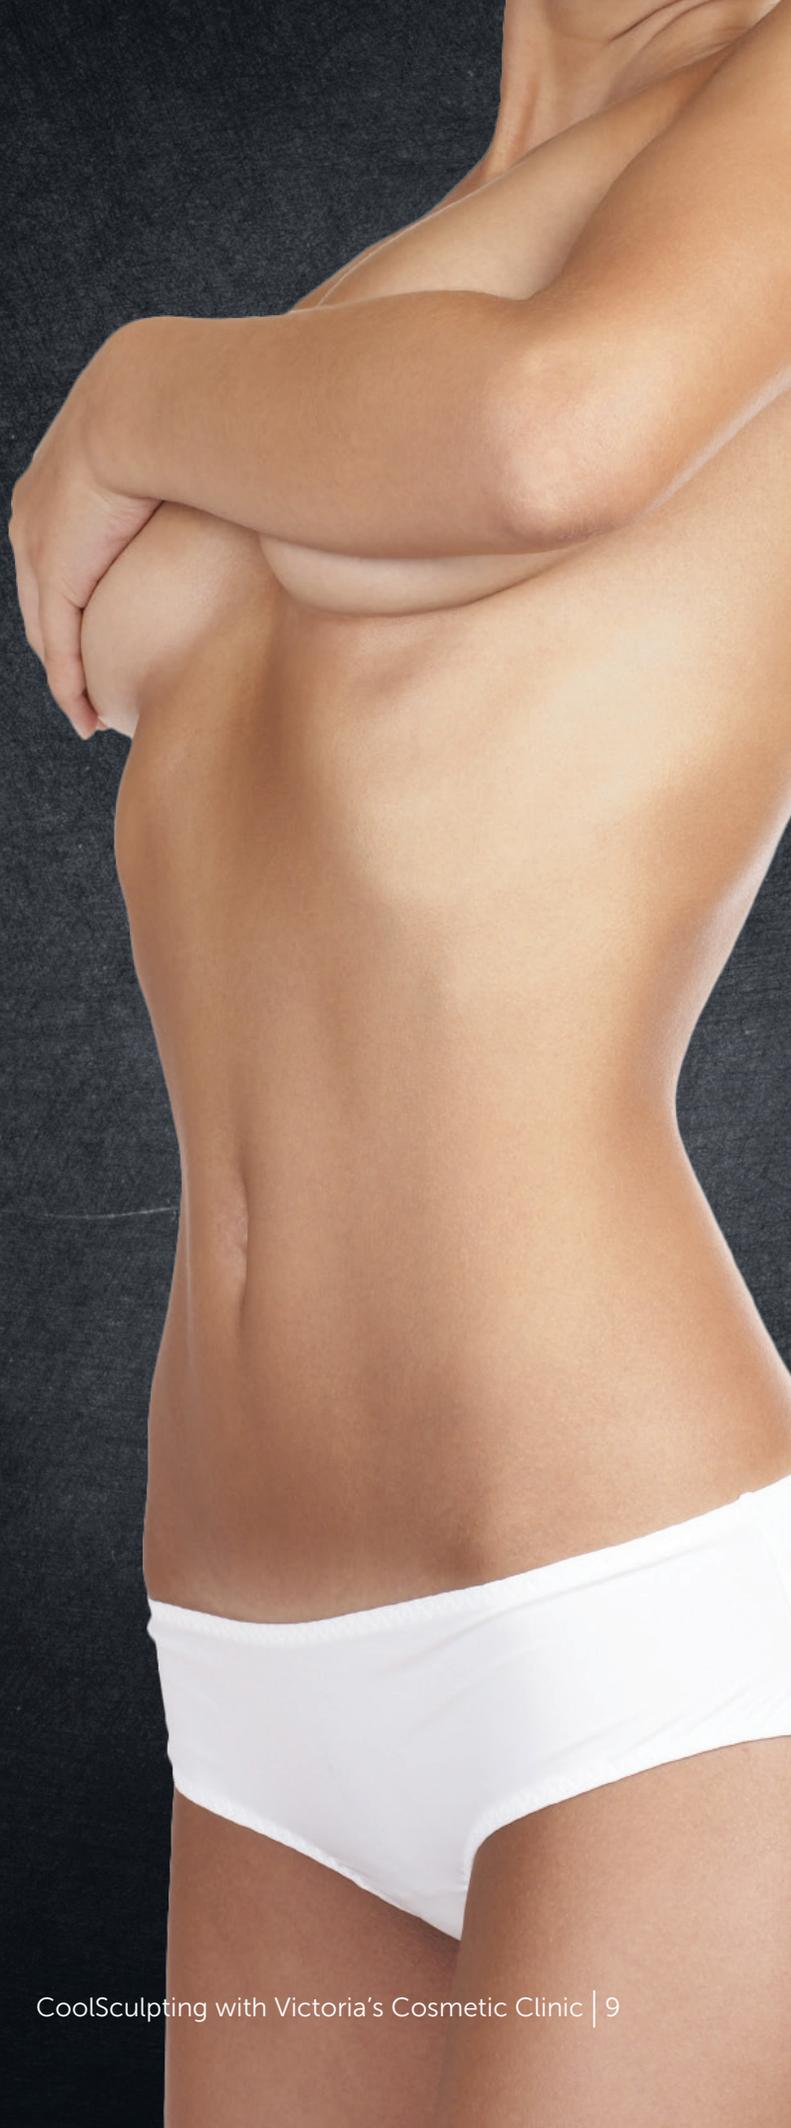

## COST

We aim to serve customers who value quality. Our treatments are detailed, highly individualised and honest.

For some people, a customised treatment plan may include more than one CoolSculpting treatment.

CoolSculpting - \$800 per treatment area

**Remember: Once the fat cells die, they are gone for good!**
